# MODULHARD'ANDREA

## What is MHD'?

A modular toolholder system for boring, milling, drilling, tapping.

A rigid high precision system, conceived and manufactured with the most advanced design and production facilities, backed by an experience over many decades in boring operations.

A system of extreme flexibility and simplicity suitable for machine tools, machining centres and flexible manufacturing systems.

A system for machining to closest tolerances with a high degree of surface finish. A system with internal coolant supply in all its components.

A system available in 8 sizes with full interchangeability of all components.

### The MHD' coupling

is the heart of the tool system as it ensures utmost rigidity and concentricity during milling and boring operations. This is achieved by the (patented) cylindrical-conical fit and by a radial expanding bolt for clamping and driving.

## Was ist das MHD'?

Ein modulares Werkzeughalterssystem zum Ausdrehen, Fräsen, Bohren und Gewindeschneiden.

Ein starres Hochpräzisionssystem, das mit den modernsten Entwurfs- und Fertigungsmitteln aufgrund unserer jahrzehntelangen Erfahrung im Ausdrehen entwickelt und hergestellt worden ist.

Ein System extremer Flexibilität und Einfachheit für Werkzeugmaschinen, Bearbeitungszentren und flexible Fertigungsbetriebe.

Ein System für Bearbeitungen auf engste Toleranzen mit hoher Oberflächengüte.

Ein System mit innerer Kühlmittelzufuhr in allen Elementen.

Ein in 8 Größen lieferbares System, das die volle Austauschbarkeit gestattet.

### Die MHD' Kupplung

ist der Schwerpunkt des MODULHARD'ANDREA, da sie maximale Starrheit und Konzentrität beim Fräsen und Bohren sichert. Das wird durch die (patentierten) zylindrisch-konische Passfläche und den radialen Spreizbolzen für Axialspannung und Mitnahme erreicht.

## ¿Qué es el MHD'?

Un sistema modular de portaherramientas para mandrinar, fresar, taladrar, roscar. Un sistema rígido, de alta precisión, estudiado y realizado con la contribución de los medios más avanzados de proyecto y fabricación y de una experiencia de muchos años en el campo del mandrinado.

Un sistema de extrema flexibilidad y simplicidad, adecuado para máquinas herramientas, centros de mecanizado y sistemas de producción flexibles.

Un sistema para mecanizaciones con estrechísimas tolerancias con superficies de alta calidad.

Un sistema de alimentación interior del refrigerante en todos sus elementos.

Un sistema suministrable en 8 tamaños con máxima intercambiabilidad de los elementos.

### El acoplamiento MHD'

es el punto de fuerza del MODULHARD'ANDREA, porque permite fresar y mandrinar con la máxima rigidez y concentricidad, gracias al acoplamiento (patentado) cilíndrico-cónico y al perno radial expansible para el bloqueo axial y el arrastre.

## Qu'est-ce que le MHD'?

Un système modulaire de porte-outils pour aléser, fraiser, percer, tarauder.

Un système rigide de haute précision, réalisé en utilisant le matériel de conception et de fabrication le plus avancé et une expérience pluridécennale dans le secteur de l'alésage.

Un système d'extrême souplesse et simplicité apte aux machines-outils, aux centres d'usinage et aux ateliers flexibles.

Un système à tolérances serrées avec surfaces de haute qualité.

Un système avec alimentation interne du liquide d'arrosage dans tous ses éléments.

Un système livrable en 8 tailles avec interchangeabilité totale des composants.

### L'accouplement MHD'

est l'atout du système d'outils parce qu'il assure une extrême rigidité et concentricité dans les opérations de fraisage et d'alésage grâce au siège cylindrique-conique (breveté) et à une tige radiale expansible pour le blocage et l'entraînement.

## Cos'è l'MHD'?

Un sistema modulare di portautensili per alesare, fresare, forare, maschiare.

Un sistema rigido, di alta precisione, studiato e realizzato con il contributo dei mezzi più avanzati di progettazione e fabbricazione e di un'esperienza pluridécennale nel campo dell'alesatura.

Un sistema di estrema flessibilità e semplicità, adatto per macchine utensili, centri di lavoro e sistemi di produzione flessibile.

Un sistema per lavorazioni a strettissime tolleranze con superfici di alta qualità. Un sistema con alimentazione interna del refrigerante in tutti i suoi elementi.

Un sistema fornibile in 8 grandezze con massima intercambiabilità degli elementi.

### L'attacco MHD'

è il punto di forza del MODULHARD'ANDREA perché consente di fresare ed alesare con massima rigidità e concentricità grazie all'accoppiamento (brevettato) cilindrico-conico e al perno radiale espandibile per il bloccaggio assiale e il trascinamento.

## Sizes and driving torque

| MHD' 80 | 80   | 42   | 8   | 80 - 90   |

## General informations

## Generalites

## Allgemeines

## Informaciones generales

## Informazioni generali

- Assembly
  - Secure the arbor to a rigid support.
  - Fit the required component (adaptor, extension, double-bit boring bar, boring head etc.) to the arbor ensuring that the radial expanding pin does not project from the cylindrical part.
  - Clamp the component by turning the radial pin clockwise with the hexagonal wrench provided or with a torque wrench.
- Disassembly
  - Secure the arbor to a rigid support.
  - Unlock the radial pin by turning it counterclockwise.
- Maintenance
  - The conical and cylindrical surfaces of each component should be cleaned and lubricated at periodic intervals.
  - The expanding radial pin should be treated regularly with an anti-souff lubricant.
  - The slide guideway of the micrometric boring bars should be cleaned and lubricated at periodic intervals.

- Montage
  - Die Grundaufnahme in einer Halterung befestigen.
  - Gewünschtes Element (Reduzierung, Verlängerung, Zweischneiderbohrstange, Ausdrehkopf usw.) einsetzen. Darauf achten, dass der radiale Spreizbolzen nicht aus dem zylindrischen Teil herausragt.
  - Element durch Rechtsdrehen des Spreizbolzen mit dem mitgelieferten Sechskantschlüssel oder einem Drehmomentschlüssel festklemmen.
- Demontage
  - Grundaufnahme in einer Halterung befestigen.
  - Spreizbolzen durch Linksdrehen lösen.
- Wartung
  - Zylindrische und konische Flächen der Elemente von Zeit zu Zeit reinigen und schmieren.
  - Den radialen Spreizbolzen mit einem Schmiermittel periodisch abschmieren.
  - Schlittenführung der mikrometrischen Bohrstangen von Zeit zu Zeit reinigen und schmieren.

- Montaje
  - Asegurar el acoplamiento base en un soporte.
  - Montar el elemento deseado (reducción, prolongación, cabezal de dos cuchillas, cabezal para mandrinar etc.) asegurándose que el perno radial no sobresalga del núcleo cilíndrico.
  - Fijar girando en sentido horario el perno radial con la llave exagonal en dotación o con una llave torsiométrica.
- Desmontaje
  - Asegurar el acoplamiento base en un soporte.
  - Desbloquear, girando a fondo en sentido antihorario, el perno radial.
- Manutención
  - Mantener limpias y lubricadas las partes cilíndrico-cónicas de los elementos.
  - Mantener lubricado con un producto antigripante el perno radial expansible.
  - Mantener limpia y lubricada la zona de deslizamiento de la guía de los cabezales micrométricos.

- Montage
  - Fixer le mandrin dans un support.
  - Monter l'élément désiré (réduction, rallonge, barre d'alésage à deux coupants, tête à aléser etc...) et s'assurer que la tige radiale expandible ne saillit pas de la partie cylindrique.
  - Bloquer l'élément en tournant la tige radiale dans le sens des aiguilles d'une montre au moyen de la clé hexagonale fournie ou d'une clé dynamométrique.
- Démontage
  - Fixer le mandrin dans un support.
  - Débloquer l'élément en tournant la tige radiale en sens inverse des aiguilles d'une montre.
- Entretien
  - Nettoyer et lubrifier périodiquement les surfaces coniques et cylindriques des composants.
  - Traiter périodiquement la tige radiale expandible avec un produit anti-grippage.
  - Nettoyer et lubrifier périodiquement le guide du coulisseau des barres d'alésage micrométriques.

- Montaggio
  - Assicurare l'attacco base in un supporto.
  - Montare l'elemento desiderato (riduzione, prolunga, baren bitagliante, testina per alesare ecc.) assicurandosi che il perno radiale non sporga dal mozzo cilindrico.
  - Bloccare ruotando in senso orario il perno radiale con la chiave esagonale in dotazione o con una chiave torsiometrica.
- Smontaggio
  - Assicurare l'attacco base in un supporto.
  - Sbloccare, ruotando a fondo in senso antiorario, il perno radiale.
- Manutenzione
  - Mantenere pulite e lubrificate le parti cilindrico-coniche degli elementi.
  - Mantenere lubrificato con un prodotto antigrippante il perno radiale espandibile.
  - Mantenere pulita e lubrificata la guida di scorrimento della slitta dei bareni micrometrici.

# MODULHARD'ANDREA

## Arbors Extensions Reductions

### ARBORS

Arbors are manufactured in accordance with DIN 69871 A-B, MAS 403 BT, DIN 2080, ANSI-CAT, DIN 69893-A and are made of carburized steel, hardened and ground to AT3 tolerance. Arbor size MHD' 80 are recommended for heavy milling and for bores deeper than 250 mm and exceeding 125 mm diameter. Special arbors are available on request.

### EXTENSIONS

Extensions of various lengths are available for each MHD' size, allowing greater flexibility in machining depth.

### REDUCTIONS

MHD' components of a smaller size can be used by means of adaptor sleeves which allow greater interchangeability and ensure tool rigidity.

## Grundaufnahmen Verlängerungen Reduzierungen

### GRUNDAUFNAHMEN

Die Grundaufnahmen entsprechen den Normen DIN 69871 A-B, MAS 403 BT, DIN 2080, ANSI-CAT, DIN 69893-A. Sie werden aus Einsatzstahl gefertigt, gehärtet und auf Toleranz AT3 geschliffen. Für schwere Fräsarbeiten und Bohrungen mit Tiefen über 250 mm und Durchmessern über 125 mm ist der Einsatz von Grundaufnahmen Größe MHD' 80 zweckmäßig. Grundaufnahmen in Sonderausführung sind auf Anfrage lieferbar.

### VERLÄNGERUNGEN

Für jede MHD' Größe sind Verlängerungen verschiedener Länge vorhanden, die eine größere Anpassungsfähigkeit an die Bearbeitungstiefe ermöglichen.

### REDUZIERUNGEN

Die Reduzierungen ermöglichen die Verwendung der Elemente einer kleineren MHD' Größe. Damit sind umfassendere Austauschbarkeit und größere Steifigkeit gegeben.

## Acoplamiento base Prolongaciones Reducciones

### ACOPLAMIENTOS BASE

Los acoplamiento son realizados según las normas DIN 69871 A-B, MAS 403 BT, DIN 2080, ANSI-CAT, DIN 69893-A y son construidos en acero cementado, templado y rectificado según tabla AT3. El empleo de acoplamiento con tamaño MHD' 80 es aconsejable para peraciones de fresado gravoso y para los mandrinados profundos, por encima de los 250 mm con diámetros superiores a 125 mm. A petición, se pueden construir acoplamiento especiales.

### PROLONGACIONES

Para cada tamaño de MHD' existen prolongaciones de diferentes longitudes que permiten optimizar las profundidades de mecanización deseadas.

### REDUCCIONES

Las reducciones permiten utilizar componentes de un tamaño MHD' más pequeño y, por lo tanto, tener mayor intercambiabilidad y estabilidad de la herramienta.

## Mandrins Rallonges Réductions

### MANDRINS

Les mandrins, conformes aux normes DIN 69871 A-B, MAS 403 BT, DIN 2080, ANSI-CAT, DIN 69893-A, sont fabriqués en acier de cémentation trempé et rectifié à la tolérance AT3. La taille MHD' 80 est conseillée pour des travaux de fraisage lourds et d'alésage de profondeur supérieure à 250 mm et de diamètre supérieur à 125 mm. Des mandrins spéciaux sont livrables sur demande.

### RALLONGES

Pour chaque taille MHD' des rallonges de différentes longueurs sont prévues. Elles permettent une plus grande souplesse d'adaptation à la profondeur d'usinage.

### RÉDUCTIONS

Les réductions sont utilisées pour l'emploi des éléments d'une taille MHD' plus petite et améliorent ainsi l'interchangeabilité et la rigidité de l'outil.

## Attacchi base Prolunghe Riduzioni

### ATTACCHI BASE

Gli attacchi sono realizzati secondo le norme DIN 69871 A-B, MAS 403 BT, DIN 2080, ANSI-CAT, DIN 69893-A e sono costruiti in acciaio cementato, temperato e rettificato secondo la tabella AT3. L'impiego di attacchi con grandezza MHD' 80 è consigliato per operazioni di fresatura pesante e per alesature profonde oltre i 250 mm con diametri superiori a 125 mm. A richiesta si possono costruire attacchi speciali.

### PROLUNGHE

Per ogni grandezza di MHD' esistono prolunghe di differenti lunghezze che consentono di ottimizzare la profondità di lavorazione desiderate.

### RIDUZIONI

Le riduzioni permettono di utilizzare componenti di una grandezza MHD' più piccola e quindi avere maggiore intercambiabilità e stabilità dell'utensile.

## Carbide bars

### CARBIDE BARS FOR DEEP-HOLE MACHINING

D'Andrea solves the deep-hole boring machining by means of a wide programme of BMD carbide bars having diameter 16, 20, 25, 32 mm and ending with MHD' arbor. BMD bars are built in three different working lengths for the machining of holes, whose depth is 6,3, 8 and 10 times the diameter/bar. On BMD bars can be mounted: TS double-bit roughing heads, TRM Testarossa finishing heads and PE chucking tools for ER collets.

## Hartmetall-Bohrstangen

### HARTMETALL-BOHRSTANGEN FÜR TIEFLOCH-BEARBEITUNGEN

D'Andrea löst das Problem der Tiefloch-Bohrbearbeitungen durch eine große Auswahl an BMD Hartmetall-Bohrstangen mit Durchmessern 16, 20, 25 und 32 mm, die mit einer MHD' Grundaufnahme enden. BMD Bohrstangen werden in drei unterschiedlichen Längen zur Bearbeitung von Bohrungen angeboten, deren Tiefen bis zum 6,3-8 oder 10-fachen des Bohrstangendurchmessers gehen können. An BMD Bohrstangen können folgende Aufsätze montiert werden: TS Zweischneiderschruppköpfe, TRM Testarossa Schlichtköpfe und PE Spannzangenfutter für ER Spannzangen.

## Barras de metal duro

### BARRAS DE METAL DURO PARA MECANIZACIONES DE AGUJEROS PROFUNDOS

Para resolver las mecanizaciones de mandrinado en agujeros profundos, D'Andrea ha realizado un amplio programa de barras de metal duro BMD de diámetro 16, 20, 25 y 32 mm, que terminan con el acoplamiento base MHD'. Se fabrican en tres medidas para mecanizaciones en agujeros profundos 6,3 – 8 y 10 veces el diámetro/barra. En las barras BMD se montan: los cabezales para desbaste de dos cuchillas TS, los cabezales para acabado TRM Testarossa y los adaptadores PE para pinzas elásticas ER.

## Barres carbure

### BARRES CARBURE POUR USINAGES DE TROUS PROFONDS

Pour accomplir les alésages de trous profonds, D'Andrea a projeté un ample programme de barres carbure BMD de diamètre 16, 20, 25 et 32 mm, avec au bout l'accouplement MHD'. Elles sont fabriquées en trois longueurs pour usiner trous profonds 6,3 – 8 – 10 fois le diamètre/barre. Sur les barres BMD on monte: têtes d'ébauche à deux coupants TS, têtes de finissage Testarossa TRM et les adaptateurs PE pour pinces ER.

## Barre in metallo duro

### BARRE IN METALLO DURO PER LAVORAZIONI DI FORI PROFONDI

Per risolvere le lavorazioni di alesatura di fori profondi D'Andrea ha realizzato un ampio programma di barre in metallo duro BMD di diametro 16, 20, 25 e 32 mm, terminanti con l'attacco MHD'. Sono costruite in tre lunghezze per lavorare fori profondi 6,3-8-10 volte il diametro/barra. Sulle barre BMD si montano: le testine di sgrossatura bitaglianti TS, le testine di finitura Testarossa TRM e gli adattatori PE per pinze elastiche ER.

ASSEMBLY

-Remove the plastic guard ring

-Insert the BLC ring and lock the A screws.

MONTAGE

-Schutzring aus Kunststoff entfernen.

-Auswuchtring BLC einsetzen und Schrauben A spannen.

MONTAJE

-Quitar el anillo de protección en plástico

-Insertar anillo BLC y fijar los tornillos A.

MONTAGE

-Enlever la bague de protection en plastique

-Insérer la bague BLC et bloquer les clefs A.

MONTAGGIO

-Togliere anello di protezione in plastica

-Inserire anello BLC e bloccare le viti A.

| Balancing rings                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Auswuchtringe                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Anillos de equilibrado                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Bagues d'équilibrage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Anelli di bilanciatura                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

Heads and double-bit boring bars

Zweischneiderköpfe und Zweischneiderbohrstangen

Barras y cabezales de dos cuchillas

Têtes et barres d'alésage à deux coupants

Testine e bareni bitaglianti

## FEATURES

The double-bit boring bars are simple and extremely stable due to serrated mating surfaces between the bit holder and the boring bar itself and also to the constant spacing between the bit holder clamp screw and the cutting edge.

## MERKMALE

Die Zweischneiderbohrstangen sind dank der Kerbzahnflächen zwischen Plattenhaltern und Körper, und dem konstanten Abstand zwischen Plattenhalterklemmschraube und der Schneide, einfach und äußerst starr aufgebaut.

## CARACTERÍSTICAS

Los cabezales de dos cuchillas son sencillos y extremadamente rígidos gracias a la amplia superficie dentada de contacto entre el asiento portaplaca y el propio cabezal, juntamente con la distancia constante entre el tornillo de bloqueo del asiento y el corte.

## CARACTÉRISTIQUES

Les barres d'alésage à deux coupants sont simples et très rigides grâce aux surfaces dentelées entre le porte-plaquette et la barre et à la distance constante entre la vis de blocage du porte-plaquette et le coupant.

## CARATTERISTICHE

I bareni bitaglianti sono semplici ed estremamente rigidi grazie alle ampie superfici dentellate di contatto tra i seggi portainserito ed il bareno stesso, unitamente alla distanza costante tra la vite di serraggio del seggio ed il tagliente.

## COMPONENTS

1. Setting screw
2. Tools clamp screws
3. Coolant outlets
4. Body
5. Bit holders

## BAUTEILE

1. Einstellschraube
2. Werkzeugklemmschrauben
3. Kühlmittelaustrittslöcher
4. Körper
5. Plattenhalter

## COMPONENTES

1. Tornillo de regulación
2. Tornillos bloqueo herramienta
3. Agujeros salida refrigerante
4. Cuerpo
5. Portaplaca

## COMPOSANTS

1. Vis de réglage
2. Vis blocage outil
3. Sortie du liquide d'arrosage
4. Corps
5. Porte-plaquettes

## COMPONENTI

1. Vite di regolazione
2. Viti bloccaggio utensile
3. Fori uscita refrigerante
4. Corpo
5. Seggio portainseriti

## Heads and double-bit boring bars

fig.a

fig.b

fig.c

### USE

The radial setting of the cutting edges should be carried out with tool presetting equipment.

The boring bars are fitted with two bit holders for roughing operations involving heavy chip removal.

The double-bit boring bars may include:

- (fig. a) two SSCC bit holders on the same plane and with the two cutting edges set at identical radial distances for high feed rate roughing operations.
- (fig. b) an SSCC bit holder and an SMCC bit holder not at the same plane and with the two cutting edges set at different radial distances for high cutting depth roughing operations.
- (fig. c) the boring bars are fitted with a single bit holder for roughing and finishing operations involving normal chip removal. The serrated surface protection plate PT should always be fitted.

### IMPORTANT NOTE

Bit holders and inserts should be firmly fixed.

### EINSATZ

Die DurchmesserEinstellung der Wendeplatten ist auf einem Maschinenwerkzeu-voreinstellgerät vorzunehmen.

Mit zwei Plattenhaltern werden die Bohrstrangen für Schrubarbeiten mit starker Spanabnahme verwendet. Diese Bohrstrangen können umfassen:

- (Abb. a) zwei Plattenhalter SSCC auf gleicher Höhe mit der Schneidkante der Wendeplatten auf gleichem Durchmesser einstellen. Für Schrubarbeiten mit großem Vorschub.
- (Abb. b) je einen Plattenhalter SSCC und SMCC auf verschiedener Höhe mit der Schneidkante der Wendeplatten auf verschiedenem Durchmesser einstellen für Schrubarbeiten mit großer Spantiefe.
- (Abb. c) mit einem Plattenhalter werden die Bohrstrangen für Schlicht- und Schrubarbeiten mit normaler Spanabnahme verwendet. PT Schutzplatte für die Korbzahnfläche immer aufsetzen.

### WICHTIGER HINWEIS

Bitte prüfen Sie, ob die Plattenhalter und Wendeplatten sicher festgespannt sind.

### EMPLEO

La regulación diametral de los cortes se efectúa sobre un banco presetting para herramientas.

Se utilizan con dos asientos para operaciones de desbaste con fuerte arranque de viruta. Los cabezales de dos cuchillas pueden estar compuestos con:

- (fig. a) dos asientos SSCC alineados y con la punta de la plaquita sobre el mismo diámetro para operaciones de desbaste con fuertes profundidades de pasada.
- (fig. b) un asiento SSCC y un asiento más bajo SMCC desalineados y con la punta de las plaquitas sobre diámetros diversos para operaciones de desbaste con fuertes profundidades de pasada.
- (fig. c) se utilizan con un solo asiento para operaciones de acabado y desbaste con normal arranque de viruta. Recordar siempre montar la plaquita PT para la protección de la superficie dentada.

### ATENCIÓN

Asegurarse que los asientos y las plaquitas estén rigidamente bloqueados.

### EMPLOI

Effectuer le réglage radial des plaquettes sur un appareil de préréglage d'outils.

Avec deux porte-plaquettes, les barres sont utilisées pour des opérations d'ébauchage avec fort enlèvement de copeaux.

- Ces barres d'alésage peuvent comprendre:
  - (fig.a) deux porte-plaquettes SSCC dans le même plan avec les coupants réglés sur le même diamètre pour l'ébauchage à haute vitesse d'avance.
  - (fig.b) un porte-plaquette SSCC et un porte-plaquette SMCC dans deux plans avec les coupants réglés sur des différents diamètres pour l'ébauchage avec grande profondeur de passe.
  - (fig.c) avec un seul porte-plaquette les barres sont utilisées pour l'ébauchage et le finissage avec enlèvement de copeaux normal. Monter toujours la plaquette PT de protection de la surface dentelée.

### NOTE IMPORTANTE

S'assurer que les porte-plaquettes et les plaquettes sont solidement bloqués.

### IMPIEGO

La regolazione diametrale dei taglienti va eseguita su un banco di presetting di utensili.

Si utilizzano con due seggi per operazioni di sgrossatura con forti asportazioni. I bareni bitaglianti possono essere composti con:

- (fig. a) due seggi SSCC allineati e con la punta degli inserti sullo stesso diametro per operazioni di sgrossatura con forti avanzamenti.
- (fig. b) un seggio SSCC ed un seggio più basso SMCC disallineati e con la punta degli inserti su diametri diversi per operazioni di sgrossatura con forti profondità di passata.
- (fig. c) si utilizzano con un solo seggio per operazioni di finitura e sgrossatura con normali asportazioni di truciolo. Ricordarsi sempre di montare la piastrina PT per la protezione della superficie dentellata.

### ATTENZIONE

## 2 μm

### FEATURES

High precision work to IT6 tolerance, with excellent surface finish, is achieved using TRM boring heads and micrometric boring bars. These are very sensitive and radial correction of 1 micron can be effected directly on the machine and easily read on the vernier scale.

### COMPONENTS

1. Body
2. Slide toolholder
3. Expanding radial pin
4. Micrometric vernier scale
5. Slide clamp screw
6. Coolant outlet
7. Tool clamp screw
8. Oiler

### MERKMALE

Die TRM Ausdrehköpfe und die mikrometrischen Bohrstanen ermöglichen Präzisionsarbeiten bis Toleranz IT6 mit optimaler Oberflächengüte. Die radiale Korrektur ist direkt an der Maschine mikrometerngenau durchführbar.

### BAUTEILE

1. Körper
2. Werkzeugschlitten
3. Spreizbolzen
4. Mikrometrischer Nonius
5. Schlittenklemmschraube
6. Kühlmittelaustrittloch
7. Werkzeugklemmschraube
8. Schmiernippel Bohrstanen.

### CARACTERÍSTICAS

Los cabezales TRM y los cabezales micrométricos permiten mecanizaciones de alta precisión con tolerancias de grado IT6 con óptimo acabado superficial. Tienen una sensibilidad de regulación de 1 micra sobre el radio, fácilmente leible en el nonio y realizable también en la máquina.

### COMPONENTES

1. Cuerpo
2. Guía portaherramientas
3. Perno radial expansible
4. Nonio micrométrico
5. Tornillo bloqueo guía
6. Agujero salida refrigerante
7. Tornillo bloqueo herramientas
8. Engasador

### CARACTÉRISTIQUES

Les têtes TRM et les barres d'alésage micrométriques permettent d'obtenir une haute précision (tolérance IT6) et une excellente qualité de surface. Le réglage radial très sensible (1 micron au rayon) est aisément lisible sur le vernier et possible même directement sur la machine.

### COMPOSANTS

1. Corps
2. Coulisseau
3. Tige radial expansible
4. Vernier micrométrique
5. Vis blocage coulisseau
6. Sortie du liquide d'arrosage
7. Vis blocage outil
8. Graisseur

### CARATTERISTICHE

Le testine TRM ed i barreni micrometrici consentono lavorazioni di alta precisione con tolleranze di grado IT6 con ottima finitura superficiale. Hanno una sensibilità di regolazione di 1 micron sul raggio, facilmente leggibile sul nonio ed eseguibile anche in macchina.

### COMPONENTI

1. Corpo
2. Slitta portautensili
3. Perno radiale espandibile
4. Nonio micrometrico
5. Vite bloccaggio slitta
6. Ugello uscita refrigerante
7. Vite bloccaggio utensili
8. Oliatore

#### IMPORTANT NOTE

- Tool and toolholder should be firmly fixed to the slide. The only screws to be used for the operations with heads and micrometric boring bars are those listed at point Components.
- The screws not listed at the point Components should not be touched in order not to compromise the correct operation of boring bars and heads.
- Bit holders and boring bars should be assembled with the insert turned on the same direction of the vernier scale (see photo).
- Loosen the screw (5) before the vernier setting(4).
- Fix the screw (5) at the end of the adjustment.

**The POSITIVE micrometric adjustment should be carried out turning the the vernier counterclockwise (4).**

- Resume the radial clearance between vernier and slide toolholder every time the vernier's direction of rotation is inverted.

#### WICHTIGER HINWEIS

- Vergewissern Sie sich immer, dass Werkzeuge und Werkzeughalter am Schlitten richtig festgeklemmt sind. Benutzen Sie ausschliesslich die in der Bauteilliste aufgeführten Schraubentypen für die Befestigung der Ausdrehköpfe und mikrometrischen Bohrstangen.
- Schrauben, die in der Bauteilliste nicht angeführt sind, dürfen nicht benutzt werden, um die einwandfreie Arbeitsweise der Bohrstangen und Ausdrehköpfe nicht zu beeinträchtigen.
- Die Wendeplatte der Plattenhalter und Bohrstangen sollen mit der zum Nonius gewandten Seite montiert werden (Siehe Bild).
- Darauf achten, die Schraube (5) vor jeder Noniuseinstellung (4) zu lockern. Die Schraube (5) am Ende der Einstellung wieder festziehen.

**Die POSITIVE mikrometrische Noniuseinstellung wird durch die Linksdrehung des Nonius (4) ausgeführt.**

- Zwischen dem Nonius und dem Werkzeugschlitten gibt es ein Umkehrradialspiel, das nach jeder Umkehr der Noniusdrehung ausgeglichen werden muss.

#### ATENCIÓN

- Asegurarse que herramientas y portaherramientas han sido bloqueados rígidamente en sus guías. Los tornillos de maniobra o de regulación útiles para el empleo de los cabezales TRM y los cabezales micrométricos están indicados en el punto "Componentes".
- Los tornillos que no están indicados en el punto "Componentes" no deben ser tocados para no comprometer el buen funcionamiento de los cabezales.
- Asientos y barras deben estar montados con la plaquita fijada en el mismo sentido que el nonio (véase foto).
- Recordar aflojar el tornillo (5) antes de ejecutar una regulación del nonio (4). Fijar el tornillo (5) al final de la regulación.

**La regulación micrométrica POSITIVA se efectúa girando el nonio en sentido antihorario (4).**

- Entre el nonio y la guía portaherramientas existe un juego radial a la inversión que tiene que ser recuperado cada vez que se invierte el sentido de rotación del mismo nonio.

#### NOTE IMPORTANTE

- S'assurer que le porte-outil et l'outil sont solidement fixés au coulisseau. Les vis à utiliser pour l'emploi des têtes et des barres d'alésage micrométriques sont indiquées sous Composants.
- Les vis pas indiquées au point Composants ne doivent pas être touchées pour ne pas nuire au bon fonctionnement des têtes et des barres d'alésage.
- Porte-plaquettes et barres d'alésage doivent être montés avec la plaquette tournée dans la même direction du vernier (voir la photo).
- Desserrer la vis (5) avant de régler le vernier (4). Bloquer la vis (5) après le réglage.

**Pour le réglage micrométrique POSITIF, tourner le vernier dans le sens inverse des aiguilles d'une montre (4).**

- Entre le vernier et le coulisseau, il y a un entablement qui doit être repris chaque fois que la direction de rotation est inversée.

#### ATTENZIONE

- Assicurarsi che utensili e portautensili siano saldamente bloccati sulla slitta. Le viti di manovra o di regolazione utili per l'impiego delle testine e dei barreni micrometrici sono solo quelle indicate nel punto Componenti.
- Le viti non indicate nel punto Componenti non devono essere toccate per non compromettere il buon funzionamento di barreni e testine.
- Seggi e barreni devono essere montati con l'inserto rivolto dalla stessa parte del nonio (vedere foto).
- Ricordarsi di allentare la vite (5) prima di eseguire una regolazione del nonio (4). Bloccare la vite (5) a fine regolazione.

**La regolazione micrometrica POSITIVA si esegue ruotando in senso antiorario il nonio (4).**

- Tra il nonio e la slitta portautensili esiste un gioco radiale all'inversione che deve essere ripreso ogni volta che si inverte il senso di rotazione del nonio stesso.

ALUMINIUM TOOLS LINE

BPS  
Ø 200 ~ 500

Technical drawing details:  
- Overall width: 80  
- Overall height: A  
- Hole diameter: Ø66.7  
- Mounting plate: PF 80/40  
- Screws: n°4 M12x35  
- Mounting plate thickness: MHD 80  
- Total length: 144  
- Distance from end to first hole: 24  
- Distance between holes: 54  
- Distance from end to last hole: 27.5  
- Mounting plate thickness: 27.5  
- Mounting plate width: 144  
- Mounting plate height: 70  
- Mounting plate material: SFCC 50, SFTP 50, TR 200  
- Mounting plate finish: CW 200

| SFQC... bit-holders perform back-facing holes finishing machining. The bit-holders can be mounted on Testarossa micrometric heads, thus allowing a working range from 20 to 802 mm diameter. | Die Schlichtbearbeitungen von Bohrungsrückseiten werden mit den SFQC... Schneidenhaltern durchgeführt. Diese werden an die mikrometrischen TRM Ausdrehköpfe montiert und ermöglichen einen Durchmesserarbeitsbereich von 20 bis 802 mm. | Las mecanizaciones de acabado en agujeros bajo escuadra se realizan con los asientos SFQC... Los asientos, montados en los cabezales micrométricos Testarossa, cubren un campo de trabajo de 20 a 802 mm. | Les usinages de finissage de trous sous-équerre s'accroissent avec les porte-plaquettes SFQC... Les porte-plaquettes montés sur les têtes micrométriques Testarossa combinent une capacité d'usinage de 20 à 802 mm. | Le lavorazioni di finitura di fori in tirata (sottosquadra) si realizzano con i seggi SFQC... I seggi montati sulle testine micrometriche Testarossa coprono un campo di lavoro da 20 a 802 mm |

## Testarossa kit

### SUPPLY

The boring heads TESTAROSSA are supplied in a box with a wide range of toolholders, tools, inserts and service wrenches.

## Testarossa Set

### LIEFERUMFANG

Die TESTAROSSA Sets werden in einem Koffer mit einem umfassenden Sortiment von Werkzeugaufnahmen, Werkzeugen, Schneidplatten und Bedienungsschlüsseln geliefert.

## Kits Testarossa

### SUMINISTRO

Los kits TESTAROSSA se suministran en un estuche, con un amplio equipo de portaherramientas, herramientas, plaquitas y llaves de servicio.

## Kit Testarossa

### FOURNITURE

Les kit TESTAROSSA sont livrés dans une boîte avec un ample assortiment de porte-outils, d'outils, de plaquettes et de clés de service.

## Kit Testarossa

### FORNITURA

I kit TESTAROSSA vengono forniti in una custodia con un ampio corredo di portautensili, utensili, inserti e chiavi di servizio.

|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>FEATURES</b><br>High precision work to IT6 tolerance and with excellent surface finish is achieved using TRM boring heads. These are very sensitive and radial correction of 1 micron can be effected directly on the machine and easily read on the vernier scale. | <b>MERKMALE</b><br>Die TRM Ausdrehköpfe ermöglichen Hochpräzisionsarbeiten auf Toleranz IT6 mit optimaler Oberflächengüte. Die Einstellung mit Radialkorrektur von 1 Mikron ist vom Nonius leicht ablesbar und auch direkt an der Maschine ausführbar. | <b>CARACTERÍSTICAS</b><br>Los cabezales TRM permiten mecanizaciones de alta precisión con tolerancias de grado IT6, con óptimo acabado superficial. Tienen una sensibilidad de regulación de 1 micra sobre el radio, fácilmente leible en el nonio y realizable también en la máquina. | <b>CARACTÉRIQUES</b><br>Les têtes TRM permettent d'obtenir une haute précision (tolérance IT6) et une excellente qualité de surface. Le réglage radial très sensible (1 micron au rayon) est aisément lisible sur le vernier et possible même directement sur la machine. | <b>CARATTERISTICHE</b><br>Le testine TRM consentono lavorazioni di alta precisione con tolleranze di grado IT6 con ottima finitura superficiale. Hanno una sensibilità di regolazione di 1 micron sul raggio, facilmente leggibile sul nonio ed eseguibile anche in macchina. |
| <b>FLEXIBILITY</b><br>The series of TRM heads permits high precision boring works from 6 to 500 mm diameter.                                                                                                                                                           | <b>FLEXIBILITÄT</b><br>Die Baureihe der TRM Ausdrehgeräte ermöglicht Hochpräzisionsausdreharbeiten von 6 bis 500 mm Durchmesser.                                                                                                                       | <b>FLEXIBILIDAD</b><br>La gama completa de los TRM permite mandrinados de alta precisión de 6 a 500 mm de diámetro.                                                                                                                                                                    | <b>FLEXIBILITÉ</b><br>La série des têtes TRM permet des alésages de haute précision de 6 à 500 mm de diamètre.                                                                                                                                                            | <b>FLESSIBILITÀ</b><br>L'intera gamma delle TRM consente alesature di alta precisione da 6 a 500 mm di diametro.                                                                                                                                                              |

## COMPONENTI

1. Corpo
2. Slitta portautensili
3. Perno radiale espandibile
4. Nonio micrometrico
5. Vite bloccaggio slitta
6. Ugello uscita refrigerante
7. Vite bloccaggio utensili

Con il Kit TRM 32 HS  
si alesano fori  
da Ø 2.5 a 12 mm.

- Inserire nell'alloggiamento l'utensile B., bloccandolo con la vite (7) assicurandosi che il tagliente dell'insero si trovi sull'asse longitudinale della slitta.

COMPONENTS

TRM 50 HS  
BAUTEILE

COMPONENTES  
TRM 50 HS

COMPOSANTS  
TRM 50 HS

COMPONENTI  
TRM 50 HS

**COMPONENTS**

1. Body
2. Tool slide
3. Expanding pin
4. Micrometric vernier scale
5. Slide lock screw
6. Coolant outlet
7. Tool lock screw
8. Oiler

The boring head TRM 50 HS bores diameters from 6 to 22 mm.

- Fit the tool B.. into seat and lock with screw (7). The cutting tool must be on the slide longitudinal axis.

**BAUTEILE**

1. Körper
2. Werkzeugschlitten
3. Spreizbolzen
4. Mikrometrischer Nonius
5. Werkzeugschlitten-klemmschraube
6. Kühlmittelaustritt
7. Werkzeugklemmschraube
8. Schmiernippel

Der Feinstbohrkopf TRM 50 HS dreht Durchmesser von 6 bis 22 mm aus.

- Werkzeug B.. in die Aufnahme einsetzen und mit Schraube (7) spannen. Versichern Sie sich, dass die Schneide der Wendeplatte auf der Längsachse des Schlittens liegt.

**COMPONENTES**

1. Cuerpo
2. Guía portaherramientas
3. Perno radial expansible
4. Nonio micrométrico
5. Tornillo bloqueo guía portaherramientas
6. Agujero salida refrigerante
7. Tornillo bloqueo herramientas
8. Engrasador

El Kit TRM 50 HS mandrina agujeros de  $\varnothing 6$  a 22 mm.

- Colocar en el alojamiento la herramienta B.. bloqueándola con el tornillo (7), asegurándose que el corte de la plaquita se encuentre sobre el eje longitudinal de la guía.

**COMPOSANTS**

1. Corps
2. Coulisseau
3. Tige radiale expansible
4. Vernier micrométrique
5. Vis blocage coulisseau
6. Sortie du liquide d'arrosage
7. Vis blocage outil
8. Graisseur

Le kit TRM 50 HS alèse des diamètres allant de 6 à 22 mm.

- Introduire l'outil B.. dans le logement et le bloquer au moyen de la vis (7) n'oubliant pas de vérifier si le taillant de l'élément intercalaire est disposé sur l'axe longitudinal du coulisseau.

**COMPONENTI**

1. Corpo
2. Slitta portautensili
3. Perno radiale espandibile
4. Nonio micrometrico
5. Vite bloccaggio slitta
6. Ugello uscita refrigerante
7. Vite bloccaggio utensili
8. Oliatore

Con il Kit TRM 50 HS si alesano fori da  $\varnothing 6$  a 22 mm.

- Inserire nell'alloggiamento l'utensile B.. bloccandolo con la vite (7) assicurandosi che il tagliente dell'inserto si trovi sull'asse longitudinale della slitta.

## Working range

## Arbeitsbereich

## Campo de trabajo

## Capacité d'usinage

## Campo di lavoro

The boring head TRM 50/50 bores diameters from 6 to 84 mm.

- For bores from  $\varnothing$  6 to 30 mm fit the tool B.. into seat and lock with screw (7). The cutting tool must be on the slide longitudinal axis.
- For bores from  $\varnothing$  28 to 54 mm fit extension P25.63 into seat and lock with screw (7).
- For bores from  $\varnothing$  54 to 84 mm fit sleeve BM10 into seat. Before tightening the screw (7) make sure that the latter engages the recess provided in sleeve BM10 which shall not project from the tool slide; if so, fit the sleeve overturned into seat. Fit the bit holder SF.. and secure it by the appropriate screw.

\* For a best flexibility of the TRM 50/50 kit, the working range of the B3.08, B3.11, B3.16, B3.22 tools is different from those suggested and reported on page 110.

Der Feinstbohrkopf TRM 50/50 dreht Durchmesser von 6 bis 84 mm aus.

- Bei Bohrungen mit Durchmesser von 6 bis 30 mm Werkzeug B.. in die Aufnahme einsetzen und mit Schraube (7) spannen. Versichern Sie sich, dass die Schneide der Wendeplatte auf der Längsachse des Schlittens liegt.
- Bei Bohrungen mit Durchmesser von 28 bis 54 mm Verlängerung P25.63 in die Aufnahme einsetzen und mit Schraube (7) spannen.
- Bei Bohrungen mit Durchmesser von 54 bis 84 mm Buchse BM10 in die Aufnahme einsetzen. Vor Anziehen der Schraube (7) darauf achten, dass sie im Einstich der Buchse BM10 eingreift und dass die Buchse aus dem Werkzeugschlitten nicht herausragt; sonst die Buchse umgekehrt einsetzen. Den Plattenhalter SF.. montieren und mit der passenden Schraube befestigen.

\* Zur höheren Flexibilität des TRM 50/50 Sets ist der Arbeitsbereich der Werkzeuge B3.08, B3.11, B3.16, B3.22 anders als der, der auf Seite 110 empfohlen und angegeben ist.

El Kit TRM 50/50 mandrina agujeros de  $\varnothing$  6 a 84 mm.

- Para los agujeros de  $\varnothing$  6 a 30 mm colocar en el alojamiento la herramienta B.. bloqueándola con el tornillo (7), asegurándose que el corte de la plaquita se encuentre sobre el eje longitudinal de la guía.
- Para los agujeros de  $\varnothing$  28 a 54 mm colocar en el alojamiento la prolongación P25.63 bloqueándola con el tornillo (7).
- Para los agujeros de  $\varnothing$  54 a 84 mm colocar en el alojamiento el casquillo BM10 bloqueándolo con el tornillo (7), prestando atención a que el casquillo no sobresalga de la guía; en caso contrario, va colocado al revés. Montar el asiento SF.. bloqueándolo con el tornillo apropiado.

\* Para una mayor flexibilidad del kit TRM 50/50 el campo de trabajo de las herramientas B3.08, B3.11, B3.16, B3.22 es diferente de lo sugerido y reproducido en la página 110.

Le kit TRM 50/50 alèse des diamètres allant de 6 à 84 mm.

- Pour des alésages de  $\varnothing$  6 à 30 mm, introduire l'outil B.. dans le logement et le bloquer au moyen de la vis (7) n'oubliant pas de vérifier si le taillant de l'élément intercalaire est disposé sur l'axe longitudinal du coulisseau.
- Pour des alésages de  $\varnothing$  28 à 54 mm, introduire la rallonge P 25.63 dans le logement et la bloquer au moyen de la vis (7).
- Pour des alésages de  $\varnothing$  54 à 84 mm, introduire la douille BM10 dans le logement. Avant de serrer la vis (7) s'assurer que la vis s'engage dans la niche prévue dans la douille BM10 et que celle-ci ne saillit pas du coulisseau, autrement l'introduire renversée. Monter le porte-plaquette SF.. et le bloquer au moyen de la vis appropriée.

\* Pour une supérieure flexibilité du kit 50/50 la capacité d'usinage des outils B3.08, B3.11, B3.16, B3.22 est différente de celui suggéré et indiqué à la page 110.

Con il Kit TRM 50/50 si alesano fori da  $\varnothing$  6 a 84 mm.

- Per i fori da  $\varnothing$  6 a 30 mm inserire nell'alloggiamento l'utensile B.. bloccandolo con la vite (7) assicurandosi che il tagliente dell'inserto si trovi sull'asse longitudinale della slitta.
- Per i fori da  $\varnothing$  28 a 54 mm inserire nell'alloggiamento la prolunga P25.63 bloccandola con la vite (7).
- Per i fori da  $\varnothing$  54 a 84 mm inserire nell'alloggiamento la bussola BM10. Prima di bloccare la vite (7) assicurarsi che la stessa entri nella nicchia ricavata nella bussola BM10 prestando attenzione che la bussola non sporga dalla slitta altrimenti va inserita capovolta. Montare il seggio SF.. bloccandolo con l'apposita vite.

\* Per una maggiore flessibilità del Kit TRM 50/50 il campo di lavoro degli utensili B3.08, B3.11, B3.16, B3.22 è differente da quello suggerito e riportato a pag. 110.

## Working range

## Arbeitsbereich

## Campo de trabajo

## Capacité d'usinage

## Campo di lavoro

The boring head TRM 80 bores diameters from 6 to 220 mm.

- For bores from Ø 6 to 30 mm fit the toolholder P20.30 at the centre of the slide and secure it by screws (9). Fit the tool B.. and secure it by screws (7). The cutting tool must be on the slide longitudinal axis.

- For bores from Ø 30 to 96 mm fit the toolholder in the slide and secure it by screws (9).

- For bores from Ø 95 to 220 mm fit the toolholder PS.. in the slide and secure it by screws (9). Fit the bit holder SF.. on the toolholder and secure it by the screw.

\* For a best flexibility of the TRM 50/80 and 80/80 kits, the working range of the B3.08, B3.11, B3.16, B3.22 tools is different from those suggested and reported on page 110.

Der Feinstbohrkopf TRM 80 dreht Durchmesser von 6 bis 220 mm aus.

- Bei Bohrungen mit Durchmesser von 6 bis 30 mm den Werkzeughalter P20.30 in die Mitte des Schlittens einsetzen und mit Schrauben (9) spannen. Werkzeug B.. montieren und mit Schrauben (7) spannen. Versichern Sie sich, dass die Schneide der Wendeplatte auf der Längsachse des Schlittens liegt.

- Bei Bohrungen mit Durchmesser von 30 bis 96 mm den Werkzeughalter P.. in den Schlitten einsetzen und mit Schrauben (9) spannen.

- Bei Bohrungen mit Durchmesser von 95 bis 220 mm den Werkzeughalter PS.. in den Schlitten einsetzen und mit Schrauben (9) spannen. Den Plattenhalter SF.. am Werkzeughalter montieren und mit Schraube spannen.

\* Zur höheren Flexibilität des TRM 50/80 und 80/80 Sets ist der Arbeitsbereich der Werkzeuge B3.08, B3.11, B3.16, B3.22 anders als der, der auf Seite 110 empfohlen und angegeben ist.

El Kit TRM 80 mandrina agujeros de Ø 6 a 220 mm.

- Para los agujeros de Ø 6 a 30 mm colocar en el centro de la guía el portaherramientas P20.30 bloqueándolo con los tornillos (9). Montar la herramienta B.. bloqueándola con los tornillos (7), asegurándose que el corte de la plaquita se encuentre sobre el eje longitudinal de la guía.

- Para los agujeros de Ø 30 a 96 mm colocar en la guía los portaherramientas P.. bloqueándolos con los tornillos (9).

- Para los agujeros de Ø 95 a 220 mm colocar en la guía los portaherramientas PS.. bloqueándolos con los tornillos (9). Montar sobre el portaherramientas el asiento SF.. bloqueándolo con el tornillo.

\* Para una mayor flexibilidad del kit TRM 50/80 y 80/80 el campo de trabajo de las herramientas B3.08, B3.11, B3.16, B3.22 es diferente de lo sugerido y reproducido en la página 110.

Le kit TRM 80 alèse des diamètres allant de 6 à 220 mm.

- Pour des alésages de Ø 6 à 30 mm, introduire le porte-outils P20.30 au centre du coulisseau et le bloquer au moyen des vis (9). Poser ensuite l'outil B.. et le bloquer au moyen des vis (7), n'oubliant pas de vérifier si le taillant de l'élément intercalaire est disposé sur l'axe longitudinal du coulisseau.

- Pour des alésages de Ø 30 à 96 mm, introduire le porte-outils P.. dans le coulisseau et le bloquer au moyen des vis (9).

- Pour des alésages de Ø 95 à 220 mm, introduire le porte-outils PS.. dans le coulisseau et le bloquer au moyen des vis (9). Monter le porte-plaquette SF.. sur le porte-outils et le bloquer au moyen de la vis.

\* Pour une supérieure flexibilité du kit 50/80 et 80/80 la capacité d'usinage des outils B3.08, B3.11, B3.16, B3.22 est différente de celui suggéré et indiqué à la page 110.

Con i Kit TRM 80 si alesano fori da Ø 6 a 220 mm.

- Per i fori da Ø 6 a 30 mm inserire al centro della slitta i portautensili P20.30 bloccandolo con le viti (9). Montare l'utensile B.. bloccandolo con le viti (7) assicurandosi che il tagliente dell'inserto si trovi sull'asse longitudinale della slitta.

- Per i fori da Ø 30 a 96 mm inserire nella slitta i portautensili P.. bloccandoli con le viti (9).

- Per i fori da Ø 95 a 220 mm inserire nella slitta i portautensili PS.. bloccandoli con le viti (9). Montare sul portautensili il seggio SF.. bloccandolo con la vite.

\* Per una maggiore flessibilità dei Kit TRM 50/80 e 80/80 il campo di lavoro degli utensili B3.08, B3.11, B3.16, B3.22 è differente da quello suggerito e riportato a pag. 110.

BAUTEILE

COMPONENTES  
TRM 80/125

COMPOSANTS  
TRM 80/125

COMPONENTI  
TRM 80/125

**COMPONENTS**

1. Body
2. Tool slide
3. Expanding pin
4. Micrometric vernier scale
5. Slide lock screw
6. Coolant outlet
8. Oiler
9. Toolholder lock screws

The boring head TRM 125 bores diameters from 36 to 500 mm.

- For bores from  $\varnothing 36$  to 137 mm fit the toolholder P.. in the slide and secure it by screws (9).
- For bores from  $\varnothing 135$  to 500 mm fit the toolholder PS.. in the slide and secure it by screws (9).  
Fit the bit holder SF.. on the toolholder and secure it by the screw.

**BAUTEILE**

1. Körper
2. Werkzeugschlitten
3. Spreizbolzen
4. Mikrometrischer Nonius
5. Werkzeugschlittenklemmschraube
6. Kühlmittelaustrittloch
8. Schmiernippel
9. Werkzeughalter-spanschrauben

Der Feinstbohrkopf TRM 125 dreht Durchmesser von 36 bis 500 mm aus.

- Bei Bohrungen mit Durchmesser von 36 bis 137 mm den Werkzeughalter P.. in den Schlitten einsetzen und mit Schrauben (9) spannen.
- Bei Bohrungen mit Durchmesser von 135 bis 500 mm den Werkzeughalter PS.. in den Schlitten einsetzen und mit Schrauben (9) spannen. Den Plattenhalter SF.. am Werkzeughalter montieren und mit Schraube spannen.

**COMPONENTES**

1. Cuerpo
2. Guía portaherramientas
3. Perno radial expansible
4. Nonio micrométrico
5. Tornillo bloqueaje guía portaherramientas
6. Agujero salida refrigerante
8. Engrasador
9. Tornillos bloqueaje portaherramientas

El kit TRM 125 mandrina agujeros de  $\varnothing 36$  a 500 mm.

- Para los agujeros de  $\varnothing 36$  a 137 mm colocar en la guía el portaherramientas P.. bloqueándolo con los tornillos (9).
- Para los agujeros de  $\varnothing 135$  a 500 mm colocar en la guía los portaherramientas PS.. bloqueándolos con los tornillos (9). Montar sobre el portaherramientas el asiento SF.. bloqueándolo con el tornillo.

**COMPOSANTS**

1. Corps
2. Coulisseau
3. Tige radiale expansible
4. Vernier micrométrique
5. Vis blocage coulisseau
6. Sortie du liquide d'arrosage
8. Graisseur
9. Vis blocage porte-outils

Le kit TRM 125 alèse des diamètres allant de 36 à 500 mm.

- Pour des alésages de  $\varnothing 36$  à 137 mm, introduire le porte-outils P.. dans le coulisseau et le bloquer au moyen des vis (9).
- Pour des alésages de  $\varnothing 135$  à 500 mm, introduire le porte-outils PS.. dans le coulisseau et le bloquer au moyen des vis (9).  
Monter le porte-plaquette SF.. sur le porte-outils et le bloquer au moyen de la vis.

**COMPONENTI**

1. Corpo
2. Slitta portautensili
3. Perno radiale espandibile
4. Nonio micrometrico
5. Vite bloccaggio slitta
6. Ugello uscita refrigerante
8. Oliatore
9. Viti bloccaggio portautensili

Con il Kit TRM 125 si alesano fori da  $\varnothing 36$  a 500 mm.

- Per i fori da  $\varnothing 36$  a 137 mm inserire nella slitta i portautensili P.. bloccandoli con le viti (9).
- Per i fori da  $\varnothing 135$  a 500 mm inserire nella slitta i portautensili PS.. bloccandoli con le viti (9). Montare sul portautensili il seggio SF.. bloccandolo con la vite.

## Chucking tools

### CHUCKING TOOLS

Combi-toolholders Weldon (DIN 1835 B) and Whistle Notch (DIN 1835 E) with axial adjustment screw.

## Spannzeuge

### WERKZEUGAUFNAHMEN

Werkzeugaufnahme für Weldon (nach DIN 1835-B) und Whistle Notch (nach DIN 1835-E) mit Axialverstellungsschraube.

## Adaptadores

### ADAPTADORES

Adaptadores combinados Weldon (DIN 1835 B) y Whistle Notch (DIN 1835 E) con tornillo de regulación axial.

## Adaptateurs

### ADAPTATEURS

Adaptateurs combinés Weldon (DIN 1835 B) et Whistle Notch (DIN 1835 E) avec vis de réglage axial.

## Adattatori

### ADATTATORI

Adattatori combinati Weldon (DIN 1835 B) e Whistle Notch (DIN 1835 E) con vite di regolazione assiale.

| Collet chucks to DIN 6499 sizes ER 11, ER 16, ER 20, ER 25, ER 32, ER 40, including axial adjustment screw. Supplied without collets.                                                               | Spannzangenfutter nach DIN 6499, Größen ER 11, ER 16, ER 20, ER 25, ER 32, ER 40 mit Axialverstell-schraube. Sie werden ohne Spannzangen geliefert.                                                          | Adaptadores portapinzas elásticas DIN 6499 tamaños ER 11, ER 16, ER 20, ER 25, ER 32, ER 40, completos con tornillos para la regulación axial. Los adaptadores se suministran sin pinzas elásticas. | Adaptateurs porte-pinces DIN 6499 tailles ER 11, ER 16, ER 20, ER 25, ER 32, ER 40 avec vis de réglage axial. Les adaptateurs sont fournis sans pinces.                                                         | Adattatori portapinze elastiche DIN 6499 grandezze ER 11, ER 16, ER 20, ER 25, ER 32, ER 40 completi di vite per la regolazione assiale. Gli adattatori vengono forniti senza pinze elastiche.          |
| Tapping chuck holders for high production thread cutting. Large length compensation in response to tension and compression. With quick-change clutch for tap holders with or without torque clutch. | Gewindeschneid-spannfutter für höchste Beanspruchung in der Serienfertigung. Großer Längenausgleich auf Zug und Druck, mit Schnellwechselkupplung für Gewindebohrerhalter mit oder ohne Drehmoment-kupplung. | Adaptadores para roscar para alta producción. Gran compensación axial, sea en compresión que en tracción. Posibilidad de utilizar manguitos de cambio rápido con y sin limitación de par.           | Adaptateurs de taraudage pour forte fabrication en série. Grande compensation de longueur en traction et compression, avec adaptateurs à changement rapide, pour porte-tarauds avec ou sans limiteur de couple. | Adattatori di maschiatura per forte produzione. Grande compensazione assiale sia in compressione sia in trazione. Possibilità di utilizzare bussole a cambio rapido, con e senza limitazione di coppia. |
| Universal milling cutter-holders for disc cutters and facing cutters. Toolholders with internal morse taper for tools with thread to DIN 228-A and tang to DIN 228-B.                               | Kombiaufsteckfräsdorne für Scheibenfräser und Planfräser. Werkzeugaufnahmen mit Morseinnekegel für Werkzeuge mit Rückzuggewinde nach DIN 228-A und Lappen nach DIN 228-B.                                    | Adaptadores portafresas combinados para fresas a disco y de planear. Adaptadores combinados para cono morse con agujero roscado DIN 228-A y con uña DIN 228-B.                                      | Adaptateurs porte-fraises combinés pour fraises à disque et fraises à surfacer Adaptateurs avec cône morse pour outils avec filetage DIN 228-A et tenon DIN 228-B.                                              | Adattatori portafrese combinati per frese a disco e spianare. Adattatori combinati per cono morse con foro filettato DIN 228-A e con dente DIN 228-B.                                                   |
| Drill chuck-holders with internal taper B16 to DIN 238.                                                                                                                                             | Bohrerfutteraufnahme mit Innenkegel B16 nach DIN 238.                                                                                                                                                        | Adaptadores para mandrinos portabrocas con acoplamiento B16 DIN 238.                                                                                                                                | Adaptateurs pour mandrins porte-forets avec filetage B16 DIN 238.                                                                                                                                               | Adattatori per mandrini portapunte con attacco B16 DIN 238.                                                                                                                                             |
| Semi-finished toolholders for special tools with hardened and ground MHD' coupling part and cylindrical part with hardness HRC 22-25.                                                               | Werkzeugaufnahmenrohling e mit gehärtetem und geschliffenem MHD' Kupplungsteil und zylindrischem Teil mit Härte HRC 22-25.                                                                                   | Adaptadores semielaborados para herramientas especiales, realizados con la parte del acoplamiento MHD' templada y rectificada y la parte cilíndrica neutra con dureza HRC 22-25.                    | Adaptateurs semi-finis pour outils spéciaux avec la partie d'accouplement MHD' trempée et rectifiée et la partie cylindrique avec dureté HRC 22-25.                                                             | Adattatori semilavorati per utensili speciali, realizzati con la parte dell'accoppiamento MHD' temprata e rettificata e la parte cilindrica neutra con durezza HRC 22-25.                               |
| Coolant chucking tools.                                                                                                                                                                             | Kühlmittelspannzeuge.                                                                                                                                                                                        | Adaptadores para líquido refrigerante.                                                                                                                                                              | Adaptateurs pour liquide d'arrosage.                                                                                                                                                                            | Adduttori per liquido refrigerante.                                                                                                                                                                     |

#### MT DIN 228-A

To chuck a morse taper tool with thread proceed as follows:

- Drive in screw 1.
- Remove expanding pin 2 and sleeve 3 to allow the Allen wrench to be introduced from the rear.
- Fit the tool and tighten screw 1 clockwise.
- Reassemble expanding pin 2 and sleeve 3.

#### MT DIN 228-B

To chuck a morse taper tool with tang remove screw 1. Combi-chucking tools for morse taper with DIN 228-A thread bore and with DIN 228-B tooth.

#### MK DIN 228-A

Zum Einspannen eines Morsekegelwerkzeuges mit Rückzuggewinde folgendermaßen vorgehen:

- Schraube 1 eindrehen.
- Spreizbolzen 2 und Buchse 3 entfernen, um den Sechskantschlüssel von hinten einführen zu können.
- Werkzeug einsetzen und Schraube 1 im Uhrzeigersinn festziehen.
- Buchse 3 und Spreizbolzen 2 wieder einsetzen.

#### MK DIN 228-B

Zum Einspannen eines Morsekegelwerkzeuges mit Austreiberlappen Schraube 1 herausdrehen. Werkzeughalter mit Morseinnenkegel für Werkzeuge mit Rückzuggewinde nach DIN 228-A und Austreiberlappen nach DIN 228-B.

#### CM DIN 228-A

Para montar una herramienta con cono morse con agujero roscado se precisa:

- Montar roscando completamente el tornillo 1.
- Quitar el perno expansible 2 y el casquillo 3 para permitir el paso posterior de la llave exagonal.
- Montar la herramienta y roscar en sentido horario el tornillo 1.
- Montar otra vez el casquillo 3 y el perno expansible 2.

#### CM DIN 228-B

Antes de montar una herramienta con cono morse con uña de arrastre, se precisa quitar el tornillo 1. Adaptadores combinados para cono morse con agujero roscado DIN 228-A y con uña DIN 228-B.

#### CM DIN 228-A

Pour monter un outil cône morse avec filetage procéder de cette façon:

- Poser la vis 1.
- Enlever la tige expansible 2 et la douille 3 pour permettre le passage postérieur de la clef hexagonale.
- Monter l'outil et serrer la vis 1 dans le sens des aiguilles d'une montre.
- Remonter la tige 2 et la douille 3.

#### CM DIN 228-B

Avant de monter un outil cône morse avec tenon, enlever la vis 1. Adaptateurs combinés pour cône morse avec trou fileté DIN 228-A et avec dent DIN 228-B

#### CM DIN 228-A

Per montare un utensile a cono morse con attacco filettato occorre:

- Montare avvitando interamente la vite 1.
- Togliere il perno espandibile 2 e la bussola 3 per permettere il passaggio posteriore della chiave esagonale.
- Montare l'utensile e avvitare in senso orario la vite 1.
- Rimontare bussola 3 e perno espandibile 2.

#### CM DIN 228-B

Prima di montare un utensile a cono morse con tenone occorre togliere la vite 1. Adattatori combinati per cono morse con foro filettato DIN 228-A e con dente DIN 228-B

Tapping chuck holders suitable for high production. Great axial adjustment both in compression and tension. There is the possibility of using quick change clutches with or without torque clutch.

Gewindeschneidspannfutter für hohe Beanspruchung in der Serienfertigung. Großer Längenausgleich auf Zug und Druck, mit Schnellwechselkupplung für Gewindebohrfutter mit oder ohne Drehmomentkupplung.

Adaptadores para roscar para alta producción. Gran compensación axial, sea en compresión que en tracción. Posibilidad de utilizar manguitos de cambio rápido con y sin limitación de par.

Adaptateurs de taraudage pour forte production. Grande compensation assiale en traction et compression, avec adaptateurs à changement rapide, pour porte-tarauds avec ou sans limiteur de couple.

Adattatori di maschiatura per forte produzione. Grande compensazione assiale sia in compressione sia in trazione. Possibilità di utilizzare bussole a cambio rapido, con e senza limitazione di coppia.

Semifinished chucking  
holders for special tools,  
manufactured with  
the tempered and ground  
part of the MHD' coupling  
and the cylindrical neutral  
part with a hardness  
of HRC 22-25.

Werkzeugaufnahmenrohling  
e mit gehärtetem und  
geschliffenem MHD'  
Kupplungsteil und  
zylindrischem Teil mit  
Härte HRC 22-25.

Adaptadores  
semielaborados para  
herramientas especiales,  
realizados con la parte del  
acoplamiento MHD'  
templada y rectificada y la  
parte cilíndrica neutra con  
dureza HRC 22-25.

Adaptateurs semi-finis  
pour outils spéciaux,  
réalisés avec la partie  
de l'accouplement MHD'  
trempée et rectifiée  
et la partie cylindrique  
neutre avec dureté  
HRC 22-25.

Adattatori semilavorati  
per utensili speciali,  
realizzati con la parte  
dell'accoppiamento MHD'  
temprata e rettificata  
e la parte cilindrica  
neutra con durezza  
HRC 22-25.
